computers & industrial engineering

Contents

Vol. 19, Nos 1–4, 1990

PROCEEDINGS OF THE 12th ANNUAL CONFERENCE ON COMPUTERS AND INDUSTRIAL ENGINEERING

SCHEDULING

xiii Editor's Note

Donald H. Liles and **Brian L. Huff** — 1 A computer based production scheduling architecture suitable for driving a reconfigurable manufacturing system

Joseph A. Svestka and **Jui-Chin (Kenny) Jiang** — 6 Toward the development of realistic rescheduling methods in real batch shops

R. Meenakshi Sundaram and **Wen-shiom Lian** — 11 A computerized algorithm for scheduling dependent jobs with weights in a single machine

Ganesan Chengalvarayan and **Sandra C. Parker** — 17 A knowledge based system for flow shop scheduling

Wilfred V. Huang and **Jianxin Tang** — 22 A new scheduling method for manufacturing systems

Theodore J. Sheskin — 27 Mixed integer program to schedule loads and charge batteries on space station

Taehee Lee — 32 New jobs regeneration methods for computer integrated manufacturing environment

Avijit Banerjee, Cheickna Sylla and **Somkiat Eiamkanchanalai** — 37 Input/output lot sizing in single stage batch production systems under constant demand

N. Singh and **Divakar Rajamani** — 42 An incremental cost and resource smoothing heuristic for the capacitated lot sizing problem

R. Meenakshi Sundaram and **Chi-Ching Yu** — 47 A scheduling strategy in the manufacture of printed circuit boards (PCBs) using surface mount technology (SMT)

Bruce R. Feiring and **Tep Sastri** — 53 Improving production planning by utilizing stochastic programming

Rasaratnam Logendran and **Thomas M. West** — 57 A machine-part based grouping algorithm in cellular manufacturing

Li Lin and **Jeffery K. Cochran** — 62 Estimating simulation metamodel parameters for unexpected shop floor real time events

John H. Ristroph — 67 Monte Carlo modeling of the tracking signal for forecast errors in computer integrated manufacture

C. Parks, J. Subramanian, S. Srinivas, A. Waikar, G. Graves, W. Williams, D. Rinks and **Godfrey Ofem**	72	A blackboard/knowledge-based systems approach to manufacturing scheduling and control
Susan A. Johnsen and **Sandar C. Parker**	77	A computer assisted scheduling system for retail organizations
John E. Biegel and **James J. Davern**	81	Genetic algorithms and job shop scheduling
		EXPERT SYSTEMS
Leslie D. Interrante and **John E. Biegel**	92	Design of knowledge-based systems: matching representations with application requirements
Weili Zhang and **Ronald Mourant**	97	Simulation and knowledge based objects
A. Masood and **K. Srihari**	102	A knowledge based approach to infrared reflow soldering
Maria A. Cianci and **Darrell G. Linton**	107	The design and implementation of an Ada-based inference engine
Nael A. Aly, Venetta J. Maytubby and **Ahmad K. Elshennawy**	111	Total quality management: an approach and a case study
Soheil Khajenoori and **Christian S. Bauer**	117	A graphics engine for design of three-dimensional structures from standardized component modules
R. Nagarajan and **Abduladhem Abdulkareem**	122	Expert data capture system for shop floor management
John Biegel and **Uma G. Gupta**	127	Expert systems in manufacturing: promises and perils
		CIM
Silvanus J. Udoka and **John W. Nazemetz**	131	An empirically based analysis of the requirements for successful implementation of advanced manufacturing technology (AMT)
Marty Muscatello and **Timothy J. Greene**	136	The hurdles of manufacturing systems implementations
Chia-hao Chang and **Jimming T. Lin**	140	Integrated decision support and expert systems in a computer integrated manufacturing environment
Silvanus J. Udoka and **John W. Nazemetz**	145	Development of a methodology for evaluating computer integrated manufacturing (CIM) implementation performance

Sheng-Hsien (Gary) Teng and **J. T. Black**	150	Manufacturing system control with Petri nets in cellular manufacturing systems
John H. Ristroph	155	Simulation of ordering rules for single level material requirements planning with a rolling horizon and no forecast error
		EDUCATION
Jennifer A. Smith and **John Lew Cox**	160	Education for manufacturing industry: the rudimentary requirements from a student's viewpoint
Larry M. Roderick and **John R. English**	165	Laboratory for quality planning and control
Safa M. Alak and **Abduladhem Abdulkarem**	170	Spreadsheet assisted learning of industrial control engineering
Abdolazim Houshyar and **Raad Dawood**	175	Development of an educational facilities layout software
Jui-Chin (Kenny) Jiang and **Joseph A. Svestka**	180	An expert system for the determination and computation of hypothesis tests
		CONTROL
Harold A. Kurstedt Jr and **Pedro M. Mendes**	185	Automated performance monitoring provides a strategic management tool for crisis management
Sencer Yeralan, David J. Ramcharan and **Terry A. Bauer**	190	A new standard for industrial control languages
C. Ray Asfahl and **Ashfaq Balagamwala**	195	SIMLOG: a Prolog-based simulator for industrial logic control systems
Balasubramanian Ram, Chin-Sheng Chen, Sanjiv Sarin and **Mysore Chandra**	200	Communication interface in a physical simulator for robotic palletization
Thomas L. Ward, Patricia A. Ralston and **Kenneth E. Stoll**	205	Intelligent control of machines and processes
Ramesh G. Soni, Hamid R. Parsaei and **Donald H. Liles**	210	A methodology for evaluating computer integrated manufacturing technologies
		VISION
Paul M. Griffin	215	3-D object pose determination using computer vision

Caroll Johnson, Ken Chapman, Jim Bowrey and **Xuan Man** — 219 A machine vision based interactive control system applied to circuit printing on a Mylar substrate

Joseph W. Foster, Cesar O. Malave and **J. Rene Villalobos** — 224 Flexible inspection within an aggregated information environment

Sherri L. Messimer — 229 Superquadric-based part identification and tolerancing

Kenneth W. Chapman, W. Carroll Johnson and **Thomas J. McLean** — 234 A high speed statistical process control application of machine vision to electronics manufacturing

Jose A. Ventura and **Sencer Yeralan** — 239 Optimization techniques for automated inspection of rectangular and square parts

Celestine A. Ntuen, Eui H. Park, Young H. Park, Jung H. Kim and **Kwang H. Sohn** — 244 The performance of KIMS in image recognition tasks

QUALITY CONTROL

Bay Arinze and **Cheickna Sylla** — 249 Information derivability analysis for quality assurance information management systems

Kailash C. Kapur, Shivakumar Raman and **P. Simin Pulat** — 254 Methodology for tolerance design using quality loss function

John R. English and **Tep Sastri** — 258 Enhanced quality control in continuous flow processes

Phadhana Tosirisuk — 263 Economic design of process parameter control limits and process adjustment intervals for continuous production processes

Robert R. Safford, David H. Gobeli and **Kai P. Suen** — 267 OMAX+ An advanced quality improvement measurement system

Kyong-sik Kang, Kenneth A. Ebeling and **Seung-houn La** — 272 The optimal location of inspection stations using a rule-based methodology

Robert R. Safford — 276 "TOTO: Total on-time operations"—a microcomputer-based statistical quality control procedure for measuring, monitoring, analyzing, and controlling transit system on-time performance

Richard A. Bihr — 280 A conceptual solution to the aircraft gate assignment problem using 0,1 linear programming

Vedaraman Sriraman, Phadhana Tosirisuk and **Hsing Wei Chu** 285 Object-oriented databases for quality function deployment and Taguchi methods

LAYOUT/MATERIAL HANDLING

Randy Allenbach and **Mary Werner** 290 Facility layout program

Sunderesh Heragu 294 Modeling the machine layout problem

Chin-Sheng Chen and **Khokiat Kengskool** 299 An AutoCAD-based expert system for plant layout

Veeravudhi Charumongkol 304 Interactive microcomputer graphic methods for smoothing craft layouts

Louis Y. Tsui and **Chia-Hao Chang** 309 A microcomputer based decision support tool for assigning dock doors in freight yards

S. Allen Broughton and **Veeravudhi Charumongkol** 313 Mean and standard deviation for the facilities design problem

Jim Lee, Richard Hoo-Gon Choi and **Majid Khaksar** 318 Evaluation of automated guided vehicle systems by simulation

Der-San Chen, Henry A. Kallsen, Hui-Chuan Chen and **Ven-Ching Tseng** 322 A bus routing system for rural school districts

ERGONOMICS

Richard A. Bihr and **William A. Eldred** 326 A standards-based automated work planning system for job shop application

Chin H. Lee and **Yasser A. Hosni** 331 A microcomputer application to metabolic workload estimation

Robert Wygant and **Raad Dawood** 336 MODCAD

Bruce D. Fischer, Bob E. White and **Robert M. Wygant** 341 WRISTRESS—A computerized system for measuring wrist stress

Carlos Acosta and **Rafael G. Moras** 346 Path planning simulator for a mobile robot

Catherine Sparks and **Robert Yearout** 351 The impacts of visual display units used for highly cognitive tasks on learning curve models

Yasser A. Hosni and **Tamim S. Hamid** 356 Voice data entry (VDE) training and implementation strategies: case study

Cheickna Sylla and **Ramaswamy Ramesh** 362 Modeling instructor training preparation in a simulation flight training program

Michael T. Dewey and **Christopher J. Bise** 367 An MIS incident-reporting program for industry

NETWORKING

Malik Sadiq, Thomas L. Landers and **R. Bruce Taylor** 373 Serial networking connectivity in factory automation

Saran Harinsuta and **William G. Sullivan** 378 ILAN intelligent local area network planning software

C. Y. Chao and **M. Ilyas** 383 Simulation of unidirectional high speed local area bus networks with multipacket messages

Joseph C. Chao and **James C. Hershauer** 387 Modeling data communications controls: a computerized decision aid for design and evaluation

M. Ilyas 392 A comparative simulation of service operations in local area ring networks

Tarun Gupta and **Eltayeb S. Abuelyaman** 397 A two phase procedure for the study of computer network reliability in automated manufacturing systems

I. Mahgoub and **M. Ilyas** 402 Approximate performance/cost analysis of *m*-level hierarchical multiprocessor systems

Samuel Awoniyi and **Soheil Khajenoori** 407 An expert system for paperwork optimization in production systems

K. Kengskool, S. Malasri, J. C. Olabe-Basogain and **C. Chen** 412 Graphics as an expert system user interfacing media

Majid Syed, Mohammad Ilyas and **Imad Mahgoub** 417 A new high speed switch for computer communication networks

Mohammad Ilyas and **Kamran Mirza** 422 Reliable optical fiber link for communications in industrial environments

CELLULAR MANUFACTURING

Tarun Gupta and **Abdolazim Houshyar** 427 Consideration of instage and central buffers in two-stage production system

Tarun Gupta and **Hamid Seifoddini** 432 Clustering algorithms for the design of a cellular manufacturing system—an analysis for their performance

A. K. Jain, R. G. Kasilingam and **S. D. Bhole**	437	Cell formation in flexible manufacturing systems under resource constraints
R. S. Lashkari and **K. Raja Gunasingh**	442	A Lagrangean relaxation approach to machine allocation in cellular manufacturing systems
K. Srihari and **C. R. Emerson**	447	Petri nets in dynamic process planning
Mukasa E. Ssemakula	452	Process planning system in the CIM environment
Jerry D. Allison	457	Combining Petrov's heuristic and the CDS heuristic in group scheduling problems
Ravi Lakkaraju and **Shivakumar Raman**	462	Optimal NC path planning: is it really possible?

GRAPHICS

Adel L. Ali, Dia L. Ali and **Kamal S. Ali**	465	The undeterministic manipulation of solid models for robot program synthesis
S. M. Alexander and **J. Guan**	469	The design and development of an automated DFA system
Lissa Galbraith, William A. Miller and **L. Leung**	472	A spreadsheet application of a decision procedure for selecting designs for manufacturing

ROBOTICS

Nourredine Boubekri and **Sherif Waly**	477	A position control algorithm for a microcomputer controlled SCARA Robot—Part I
Ravindra Sunku and **Adedeji B. Badiru**	481	ROBEX—robot expert. An expert system for manufacturing robot system implementation
Eui H. Park, Celestine Ntuen, Greta Ferguson and **Young H. Park**	484	A task-oriented system simulator for telerobotic environments
Adel L. Ali and **Roger Nagel**	489	A man–machine approach for robot grasp planning

PROJECT MANAGEMENT

M. S. Eid and **G. Losier**	495	QCMS—a quality control management system
Elden L. DePorter and **Kimberly P. Ellis**	500	Optimization of project networks with goal programming and fuzzy linear programming
Marco A. Mongalo and **Jim Lee**	505	A comparative study of methods for probabilistic project scheduling

Regan G. Fulmer, C. Patrick Koelling, Anne R. Doss and **Harold A. Kurstedt Jr** — 510 The effects of information availability on the group consensus process

M. Khattab and **F. Choobineh** — 514 A new heuristic for project scheduling with a single resource constraint

ECONOMIC JUSTIFICATION

Marilyn S. Jones and **H. J. Freeman** — 519 Are microcomputers being used in capital investment justifications?

Masaaki Moribayashi and **Chao-Yen Wu** — 524 A decision support system for capital budgeting and allocation

Bob White — 529 Capital budgeting and project selection on a microcomputer

Young H. Park, Eui H. Park and **Celestine A. Ntuen** — 534 Investment decisions: an integrated economic and strategic approach

Lawrence C. Leung, William A. Miller and **Geoffrey Okogbaa** — 539 Justification of manufacturing expert systems: a framework for analysis

Janardan Kulkarni and **Hamid R. Parsaei** — 544 Tailoring search strategy for literature on economic justification of computer integrated manufacturing

SOFTWARE DEVELOPMENT

Mary C. Holcomb and **Elden L. DePorter** — 548 A linear programming application helps feed the homeless

Noemi Paz, William Leigh, Jim Pullin and **Jim Ragusa** — 553 Information systems configuration by expert system: the case of maintenance management

Henry Lewandowski — 557 Software development: designing for the user

Wade C. Driscoll — 562 Bootstrapping—an alternative to ANOVA

Masato Sasaki, Mitsuo Gen and **Kenichi Ida** — 567 Interactive sequential fuzzy goal programming

APPLICATIONS

Terry K. Tremwel, Larry W. Miller and **Kenneth L. Campbell** — 572 A software-based method of data collection and sampler control for contaminant modeling

S. Yeralan, C. M. Klein and **J. A. Ventura** — 577 Organization design—computational methods under vagueness

Wossenu Abtew, Rafael G. Moras and **K. L. Campbell** — 582 Synthetic precipitation data generation

T. R. Branson, A. K. Elshennawy, W. W. Swart and **Subrato Chandra** 587 Automation technologies for the industrialized housing manufacturing industry
